Listening to Sermons Online

1. Open up your web browser & go to www.northcoastcalvary.org
2. Click on the little headphones that say “listen”. This page is our Most Recent Audio and displays the last 3 weekends' messages. For more messages or devotionals, click on Archives or Devotionals.
3. When you come to the message, sermon, or devotional you’d like to hear, click the button that says “listen” with the headphones. Your message will automatically start playing on the next page. (It may take a minute to load.)

Downloading Sermons to Your Computer
3a. Follow the steps above until you get to the listen button. Instead of clicking through to listen to the sermon, right click (on a PC) on the button, or Control+Click on a Mac. This will make a menu come down. Use your mouse to select "Download Linked File".
4. Depending on the speed of your internet, the file will download to your computer in a few minutes or so. If you are using a Mac, the download will go to a folder called “Downloads”, accessible from your task bar. If you are running Windows, the download will go to your specified download folder. Find the file – which will be labeled by date in this fashion: YYYY.MM.DD.mp3 – and double click. It will open in iTunes (or your preferred music management program).

Getting Sermons on Your iPod
There are two different ways to have NCCC on your iPod.

To Manually Add Downloaded Sermons One-at-a-Time
- Follow the steps above and plug your iPod, iPhone, or iPad into your computer.
- In iTunes, create a playlist by clicking File > New Playlist. Name the playlist “NCCC Sermons”.
- Identify the sermon you want to put onto your iPod and drag it into this new playlist.
- Sync this playlist from iTunes to your iPod by left-clicking the name of your device in the left panel and navigating to the Playlists tab. Check the "Sync Playlists" button and answer "yes" to the popup dialog box. Make sure you select the desired playlist in the list that follows.
- Eject your iPod and remove it from the computer.

To Subscribe to our Sermon Podcast
- Open iTunes and click on the "Store" button in the left hand side of the panel (not the same as the icon above), click "Podcasts," and use the search bar to look for our podcast. You can search for North Coast Calvary.
- You can choose individual sermons to download. Just click the button that says “free” next to the sermon. Another option is to click "Subscribe". iTunes will prompt you with a dialog box asking you to confirm your subscription. Click "yes" and allow iTunes to download the most recent episode. It will automatically download future episodes as they become available. Your podcast subscriptions will appear in the left hand panel under the Podcast Library category.
- Sync all desired podcasts from iTunes to your iPod by left-clicking the name of your device in the left panel and navigating to the Podcasts tab at the right (different from the Podcasts library above). Check the "Sync Podcasts" button and answer "yes" to the popup dialog box. Make sure you select all desired podcasts in the list that follows, or iTunes will overwrite any existing podcasts on your iPod if they are not checked.
- Eject your iPod and remove it from the computer.

Enjoy listening to the sermon!
